Act for the rights of the child!

Since the 1990s, the state of the Karnataka has experienced strong economic growth. This development gives rise to new hopes in terms of development. However, a large part of the population of Karnataka especially in rural areas, still lives in great poverty. The most affected by social inequalities are children. France India Karnataka association, through its programs in Halligudi and the surrounding villages, participates in the protection of children's rights: the right to health, water, food, education and protection.

Under the guidance of our medical coordinator, Doctor Gojnur, the association aids for the rights of children through its medical camps. Every month, a village in Gadag district and Halligudi is visited. In March, our paediatric camp was held in the village of Savanur Taluka near Haveri. On this occasion, 90 children and their families were taken in by the medical team.

Your annual membership and donations to the association allow us to continue, month after month, our actions. Thank you for your unwavering support and generosity!

SHRI MAHESH GHATRADYAL HERI
DIST GADAG, KARNATAKA, IRDIA
